

Military Combat Swim Board TAC-100

TAC-100A

TAC-100D

TAC-100-2

Ordering Part Numbers

TAC-100AI	Complete Navigation Board with Analog Imperial Depth Gauge and Dive Chronometer
TAC-100AM	Complete Navigation Board with Analog Metric Depth Gauge and Dive Chronometer
TAC-100D	Complete Navigation Board with DG100
TAC-100-1	Bare Navigation Board
TAC-100-2	Underwater Compass
TAC-100-4	Carrying Bag
TAC-100-1/2	Navigation Board with Underwater Compass
TAC-100-1/2/4	Navigation Board with Underwater Compass and Carrying Bag

Specifications TAC100-1

Size of Board:	12"L	(30.5cm)
	10"W	(25.4cm)
	5"H	(12.7cm)
Weight in Air	3lbs	(1.35Kg)
Board Material	Black ABS	
Compass Illumination	Adjustable Chem-Light	
Compass Tilt	20° N&S and 40° E&W	

The TAC-100 Underwater Navigation Board is the original navigation platform used by professional divers around the world. The TAC-100 integrates a underwater compass onto a rugged and lightweight high impact plastic console with easy-to-grip handles. The underwater compass utilizes a black compass card with luminous markings to indicate heading. Internal lubber-lines keep the diver on course. A built-in adjustable chem-light holder on the console illuminates the compass for night ops.

The TAC-100 offers different instrumentation options and comes with a padded carrying bag.

Two options are offered for instrumentation packages. The DG100 is a rugged digital depth gauge and timer that tracks both divers depth and time in one compact package. The second option is a analog depth gauge and dive chronometer. Both options offer effective solutions for accurate navigation during critical dive situations.
