- Weight: 0.6 pound (226,8 grams)

Surface Conversion Kit

Converts a 2010, 2001B-2, or 1001B into a portable surface station.

The CDK-6 Surface Accessory Kit is designed to convert an SSB-2010, SSB-2001B-2, or SSB-1001B into a portable surface station. After a quick and easy installation, you can talk to other divers and/or surface stations within range and on the same channel.

The Kit consists of a deluxe headset with boom microphone with a built in Push-to-talk (PTT) control, and a 55' transducer cable including connectors. Once installation has been completed, you may control the dive unit via the PTT control and may modify your settings for VOX/PTT mode, squelch, earphone volume, and channel.

The CDK-6 is perfect for fast response and when space is an issue. Many team leaders utilize the CDK-6 in small craft.

Aquacom STX-101, SSB 4-channel, surface station (5 Watts Output Power)

Aquacom SSB 4-channel, surface station. Incl. Hand held mic. & transducer/cable.

The Aquacom® STX-101 surface transceiver is a 5-watt, multichannel, single sideband underwater transceiver designed with the Professional Search & Rescue Teams in mind. The STX-101 offers four channels that match the SSB-2010. This system is tough, powerful and a must for any serious Search & Rescue Team. STX-101 is also very affordable!
